addastone®

Resin Bonded Surfacing System From Addagrip Terraco Ltd

Providing the
look of loose gravel
without the
maintenance
issues

Experts in Resin Since 1980

The Addastone Resin Bonded system provides an attractive, hard wearing, anti-slip surface by bonding loose gravel to asphalt, concrete, wood or metal.

Aggregates bonded in this way give the appearance of loose gravel without the maintenance issues of migrating stone.

A wide selection of aggregates is available to give a natural looking finish ideal for heritage sites, landscaping schemes, visitor attractions and those projects that require the traditional look of loose gravel. See our website for full details www.addagrip.co.uk

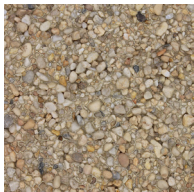

A range of natural aggregate colours are available to suit most project needs.
