## CFP SDL UK Buffettology Fund – General Income Shares

A sub-fund of the Castlefield Funds

General Income Shares, ISIN GB00BKJ9C676

Authorised Corporate Director – Castlefield Fund Partners Limited

### Objectives and investment policy

The investment objective of the Fund is to seek to achieve an annual compounding rate of return over the long term, defined as 5 – 10 years, which is superior to the median performance of all of the funds forming the official peer group of which the Fund is part. 'Peer group' is defined as being the Investment Association sector to which the Fund has been allocated (currently being the UK All Companies Sector) or to which it may be allocated in future, as determined by that body. Investments will be made principally in UK equities with strong operating franchises and experienced management teams, applying the methodology of Business Perspective Investing.

The Fund may also invest in other transferable securities, money market instruments, units and/or Shares in other collective investment schemes, deposits, warrants, cash and near cash. The Investment Adviser will adopt a focussed approach to investing in shares of those companies which it believes have strong operating franchises and experienced management teams and whose shares are undervalued and offer the potential for improved economic growth.

The Fund may also invest in derivatives and forward transactions (for hedging purposes). The Fund may borrow and may enter into stock lending and underwriting transactions in accordance with COLL.

### Risk and Reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The coloured area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

The Fund is ranked as a 5 because it has experienced relatively high rises and falls in value over the past five years.

Please note that even the lowest ranking does not mean a risk-free investment.

As there is less than five years of available data for this Fund, for illustrative purposes a similar type of investment has been used to calculate the risk/reward profile.

The Fund holds equities concentrated by number and by location in the UK. Equities, as an asset class, tend to experience higher volatility than many other assets such as bonds or money market instruments. Funds concentrated by number of assets and/or geographic location are more vulnerable to market sentiment impacting on one or more of those assets or location and can carry a higher risk than funds holding more diversified assets.

**Liquidity risk:** during difficult market conditions some securities, such as structured investments, corporate bonds and positions in emerging markets, may become more difficult to sell at a desired price.

**Counterparty risk:** arising from securities which require a specific entity, usually a large bank, to honour its obligations to the fund.

**Operational risk:** arising from investments in overseas markets, in particular emerging market countries, which may not have the same level of safekeeping and other controls as UK markets.

**Legal or tax risk:** arising from a change in legal regulations, tax rules or the application of them.
