terrabase® rustic

‘Minimum/no-dig’ Patented System

Terrabase Rustic is an innovative patented paving system that provides a decorative and natural looking permeable surface without the need for a concrete or asphalt base.

Terrabase Rustic can be applied directly on to most suitable surfaces and gradients with minimum digging or edging required. An ideal replacement for self binding surfaces or overlaying concrete, tiles or block paved areas - subject to survey.

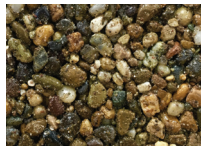

The innovative structured build-up ensures a SuDS compliant surface allowing water to drain through the product when installed onto a compacted MOT Type 3 sub-base or similar.

Terrabase Rustic is suitable for pedestrian footpaths or areas subject to trafficking by light vehicles - driveways and car standing areas.

Blends for Pedestrian & Light Vehicle use
