

PRESS RELEASE #2 – 30th December 2020

Group C Super Cup Bosch Hockenheim Historic 7-9th May 2021 – Main Sponsor announced

Group C/GTP Racing, GMS GmbH and Bosch Hockenheim Historic are pleased to announce **KW automotive GmbH** as the main sponsor of the feature race at the 2021 Bosch Hockenheim Historic - Group C Super Cup.

Since its formation in 1995, KW automotive GmbH has been a commercial partner of various motor sports teams and produces the high-performance prestige products for the Mercedes-AMG – SLK 55, CLK 63 and SL 65 AMG Black Series. The special suspension KW has developed meets the high demands required by Mercedes-AMG.

For many years they have also been the official development & production partner of Roush Performance USA equipping all high-performance Roush Ford Mustang models with KW sports suspensions in different adjustments.

Additionally, KW co-operates with Chrysler USA whose Viper SRT10 ACR has entered the market in 2007. This 600hp race car is only available in a limited edition, is based on the Dodge Viper 2008 and is equipped with a KW coil over suspension which KW especially developed for Chrysler.

For drivers of historic and classic cars, KW Automotive offer the opportunity to manufacture an individual suspension kit, according to customer specific needs, taking into account all the requirements that can significantly affect performance. This includes ride height, ground clearance, wheel loads, spring deflection, spring stiffness and degree of damping, depending on the intended use on the road, rallies or racing at historic motorsport events.

We welcome them as our main sponsor and bringing that expertise to the event.

Further sponsors to be announced in due course

KW automotive GmbH

Founded in 1995, with 3 employees, KW automotive GmbH is the epitome for premium products in car tuning and automobile refinement, offering its customers the largest suspension programme world-wide. Based in Fichtenberg, Baden-Württemberg it now has 200 employees & operates from their extensive manufacturing and development test centre facility.

One of only 15 globally, their state-of-the art hydraulic drive dynamics test stand can simulate different race track conditions and are used by race teams for their research and development. For the teams this saves both costs and time, as all vehicle-relevant race track characteristics can be simulated with this test stand without exposing the car to unnecessary wear. This technology offers KW unprecedented test opportunities for applications in the automobile industry and in motor sports.

The Bosch Hockenheim Historic - The Jim Clark Revival is an established motorsport event for vintage and young timers that draws large visitor numbers from Germany and throughout Europe to the traditional racing track in Baden each year. With twelve spectacular racing series & more than 500 participants bringing the magic of past racing days back to the time-honoured Motodrom, which has served as the stage for countless memorable racing battles.
