## CFP SDL Free Spirit Fund – General Income Shares

A sub-fund of the CFP Sanford DeLand Funds

General Income Shares, ISIN GB00BYQC495

Authorised Corporate Director – ConBrio Fund Partners Limited

### Objectives and investment policy

The investment objective of the fund is to seek to maximise total returns over the long term, defined as 5–10 years. At least 80% of the Fund will be invested within UK equities, with an emphasis on smaller and mid capitalised companies. The Fund will have a concentrated portfolio of between 25 and 40 holdings when fully invested. The Investment Adviser applies the methodology of Business Perspective Investing.

Business Perspective Investing identifies companies that exhibit criteria considered essential to the long term success of that business, and are expected to possess strong operating franchises and experienced management teams. Investments are to be made at a valuation deemed to provide shareholder value over the intended long term period of investment, not to be sold for short term profits.

Further information regarding the investment criteria adopted in Business Perspective Investing can be obtained directly from the Investment Adviser or at [www.sanford-deland.com/15/about-sdl/the-principles/business-perspective-investing](http://www.sanford-deland.com/15/about-sdl/the-principles/business-perspective-investing).

UK equities are defined as shares of companies which are

domiciled, incorporated or conduct a significant part of their business in the UK. The fund may also invest in derivatives and forward transactions (for efficient portfolio management purposes). The fund may borrow and may enter into underwriting transactions in accordance with COLL. The Fund may also invest in other transferable securities, money market instruments, units/shares in other collective schemes, deposits, warrants, cash and near cash.

Performance may be measured relative to the performance of all of the funds forming the official peer group of which the fund is part. 'Peer group' is defined as being the Investment Association sector to which the fund has been allocated (currently being the UK All Companies sector) or which it may be allocated in future, as determined by that body.

Holders can buy, sell and switch shares in the Fund on any UK business day. Instruction must be received before 12 noon to buy shares at that day's price.

Any dividend income from the Fund is distributed on a half-yearly basis.

### Risk and Reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The coloured area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards			Typically higher rewards			
Lower Risk			Higher risk			
1	2	3	4	5	6	7

The Fund is ranked as a **5** because it has experienced relatively medium to high rises and falls in value historically. The risk number shown is not guaranteed and may change over time.

Please note that even the lowest ranking does not mean a risk-free investment.

As there is less than five years of available data for this Fund, for illustrative purposes a portfolio with a comparable asset allocation has been used to calculate the risk/reward profile where data for this fund is not available.

The Fund holds a concentrated portfolio of UK equities listed

on the LSE or quoted on AIM/ISDX. Equities, as an asset class, tend to experience higher volatility than many other assets such as bonds or money market instruments. Funds concentrated by number of assets and/or geographic location are more vulnerable to market sentiment impacting on one or more of those assets or location and can carry a higher risk than funds holding more diversified assets.

A more detailed description of the risks identified as being applicable to the Fund are set out in the 'Risk Factors' section of the Prospectus.

**Liquidity risk:** during difficult market conditions some securities, such as structured investments, corporate bonds and positions in emerging markets, may become more difficult to sell at a desired price.

**Counterparty risk:** arising from securities which require a specific entity, usually a large bank, to honour its obligations to the fund.

**Operational risk:** arising from investments in overseas markets, in particular emerging market countries, which may not have the same level of safekeeping and other controls as UK markets.

**Legal or tax risk:** arising from a change in legal regulations, tax rules or the application of them.
