

A school trip to the city of London is an excellent way to truly inspire a next generation of scientists.

A visit to the Science Museum will ignite curiosity, encourage scientific endeavour and spark imagination. From an all-new exhibition to stunning IMAX documentaries, along with the usual favourites including Wonderlab, Pattern Pod, and Exploring Space there's no shortage of activity at the Science Museum.

And just across the road at the Natural History Museum, your school group could meet Museum scientists working at the forefront of space research. Get answers to pressing questions about our solar system, space missions, space travel, and the search for life on Mars.

In addition, London has seen some innovative, unique visits open for your students to explore, including Centre of the Cell, a wonderful science education visit and workshops set in a working biomedical research laboratory.
